## WHAT IS ELECTRO PHOTON IMAGING :

Is based on stimulated emission of photons and electrons in excited states in a high-density electromagnetic field. The avalanche and sliding discharge effects that take place, function as amplification of weak emissions of electrons in excited states and photons (photon-multiplier effect) from materials or living objects/subjects.

## Blue Sapphire Bio Photon Study Images

## HOW DOES IT FUNCTION:

EPI utilizes a weak, electrical current applied to the fingertips for less than a millisecond. The body's response to this stimulus is the formation of a variation of an "electron cloud" composed of light energy photons. The electronic "glow" of this

discharge (invisible to the human eye) is captured by an optical CCD camera system and then translated into a digital computer file.

## WHAT IS MEASURED WITH GDV:

Humans, plants, soil, gemstones, crystals, water and all biological systems.

# We are ALL children of the Sun, living on the light of the world, and we ourselves (cells) emit light!

## WHAT CAN WE LEARN FROM THIS:

- Express-assessment of psycho-emotional and physiological states of a human body
- Express-assessment of stress level
- Express-assessment of overall wellness
- Express-assessment of energy state of organs and systems in human body
- Revealing of real reasons and sources of illness
- Holotropic states of consciousness
- Assessment of person's reaction on different energetic practices and meditation
- Assessment of person's reaction on different influences and physical loads
- Assessment of person's reaction on the applied treatment (energy therapy, SPA, massage, color therapy, acupuncture, meditation, relaxation, extrasensory influences, etc.)
